

Important files from C-Monitor client on CM portal offer an option to download files with backup settings for a concrete computer, you may download a file with scheduled tasks of the C-Monitor scheduler, you may view the gathered data about NTFS authorizations, here you'll find the output file from the C-Descript module, configuration files for Watches and much more. The entrance into important files of C-Monitor client leads through the CM portal, in the section *Admin zone -> C-Monitor client -> Files downloaded from computers -> Choose a device using the upper filter -> press the button Show.*

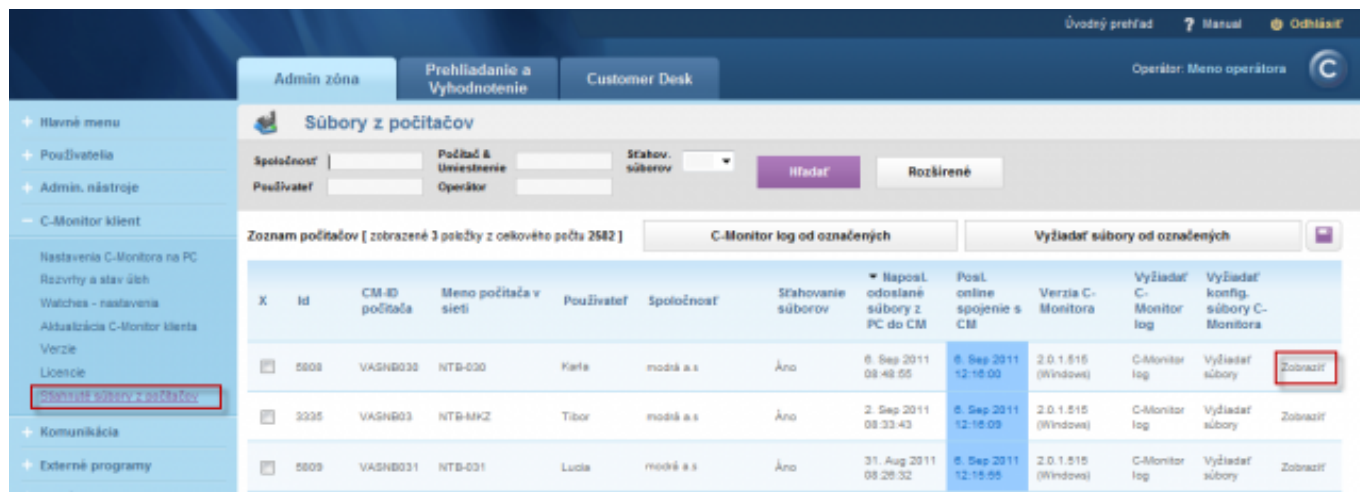

Image: Vstup do stiahnutých súborov z počítačov

Then a list of files downloaded for a concrete device will load, as displayed on the following image

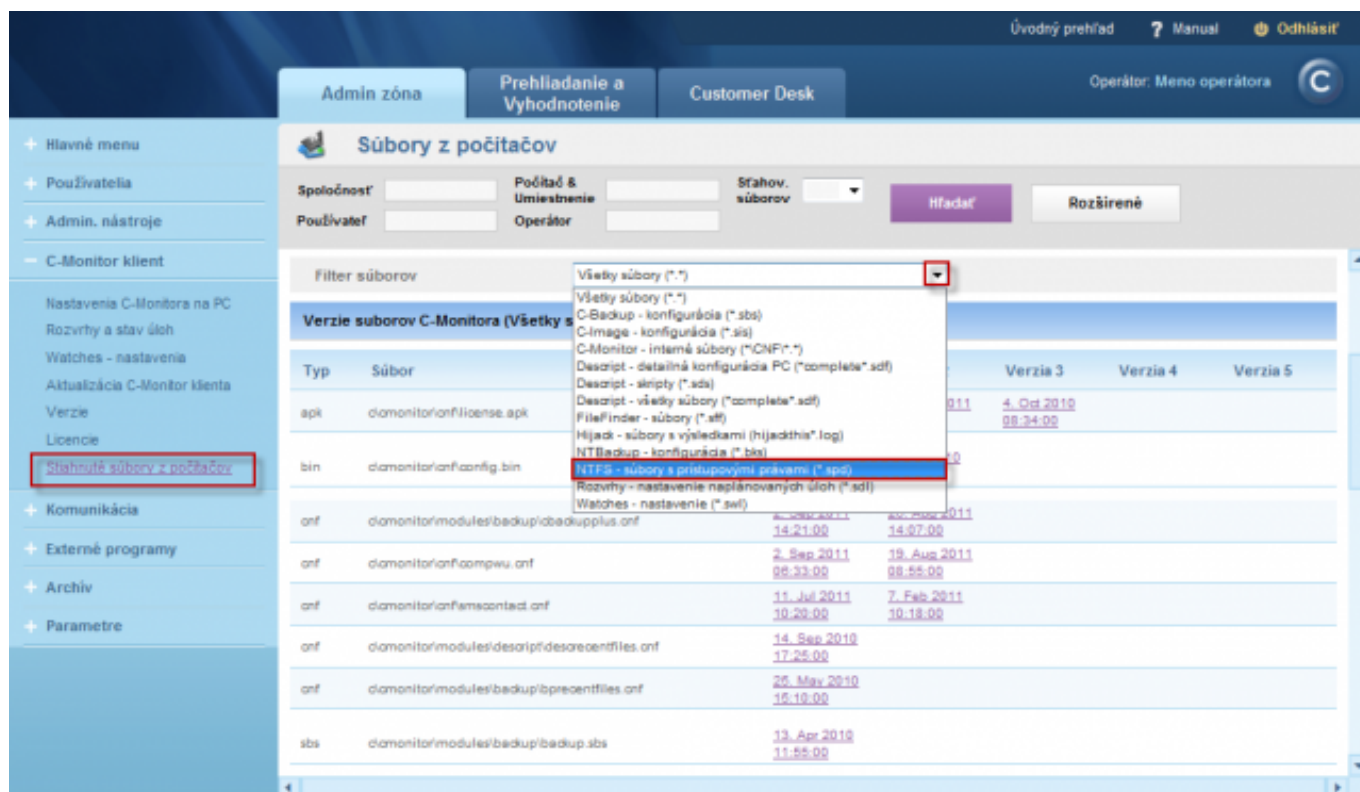

Image: Zoznam stiahnutých súborov z konkrétneho počítača, zobrazenie filtra pre výber požadovaného typu súborov

Description of the individual file types is given in the section [List of file extensions](#) [1].
