

Email communication from C-Monitor may be displayed after entering the Scheduler, as displayed on the next image. The particular sections are described in the text below.

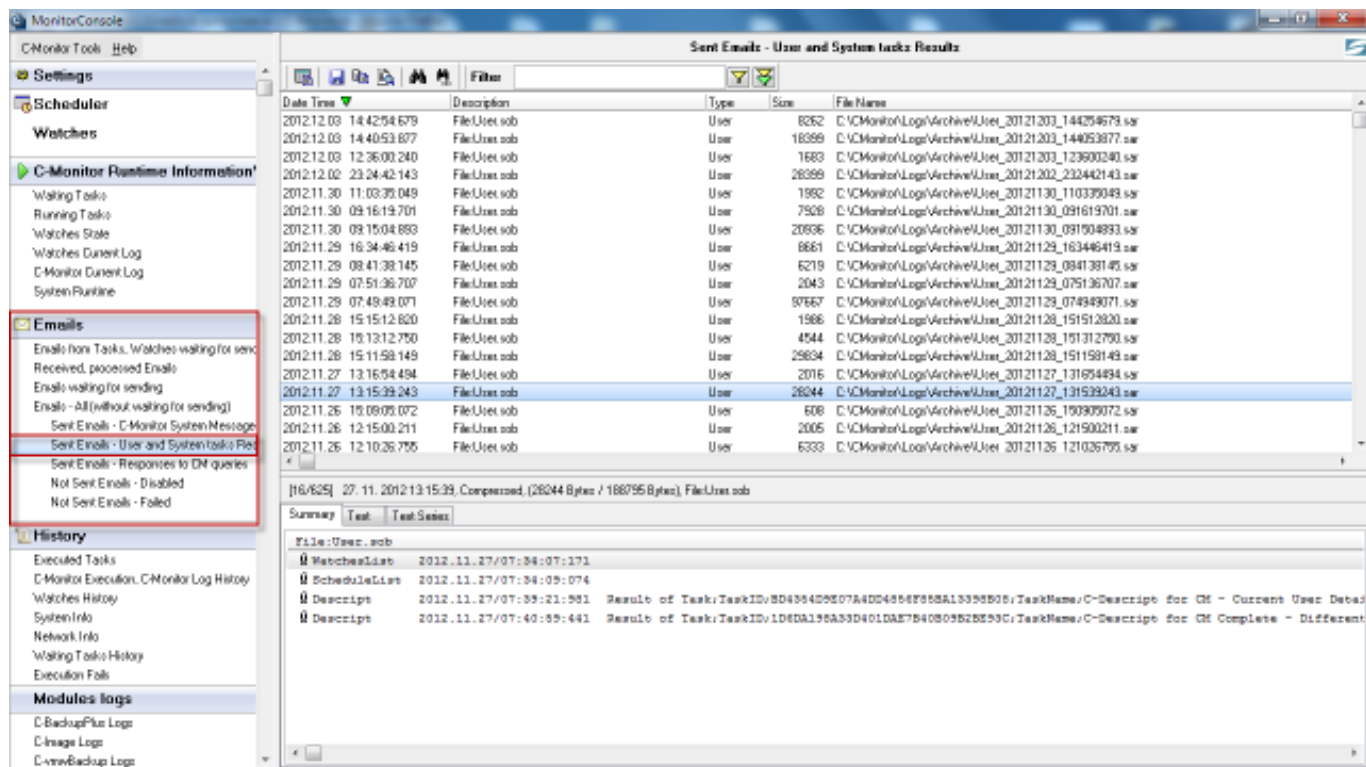

Image: Emailová komunikácia z C-Monitora

*Emails from Tasks, Watches waiting for sending* - emails intended for operators and customers, notification emails from tasks and watches waiting to be sent. They aren't archived anywhere after sending and they can be read normally.

*Received, processed Emails* - Processed emails received through POP3

*Emails waiting for sending* - Results of scheduled tasks waiting to be processed

*Emails - All (without waiting for sending)*

*Sent Emails - C-Monitor System Messages* - Defaultly disabled: system messages sent from C-Monitor (monitorlog.log, watches.log)

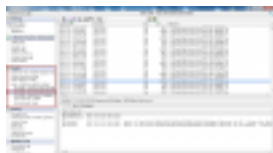

***Sent Emails - User and System tasks Results - emails intended for CM server, successfully sent***

*Sent Emails - Response to CM queries* - Email responses to requests from CM Server, delivered by both POP3 and HTTP, e.g. request for list of partitions

*Not Sent Emails - Disabled* - Archive of messages from disabled functions

*Not Sent Emails - Failed* - Failed messages
