

Information about transfer speed on network adapters can be found in the section *Presentation and Evaluation -> Presentation -> Online information*  
-> Select a specific device using the upper filter.

The screenshot shows the Customer Monitor web interface. The top navigation bar includes 'Admin zóna', 'Prehliadanie a Vyhodnotenie' (highlighted with a red box), 'Customer Desk', and 'Communicator'. The left sidebar has a menu with 'Online informácie' highlighted by a red box and an arrow. The main content area displays a table of network adapters with their transfer speeds. The table has columns for 'Local ip', 'Ip mac', 'Gateway ip mac', 'Adapter name', and 'Transfer speed'. The data is organized into two sections: 'Local ip 1' and 'Local ip 2'. The 'Transfer speed' column shows 'Avg down speed in last 30s' and 'Avg up speed in last 30s' for each adapter. The values are 124 B/s and 14 B/s for Local ip 1, and 335 B/s and 200 B/s for Local ip 2. The table is filtered by 'Online informácie' and 'Zóny'.

| Local ip   | Ip mac                            | Gateway ip mac                  | Adapter name                                  | Avg down speed in last 30s | Avg up speed in last 30s |
|------------|-----------------------------------|---------------------------------|-----------------------------------------------|----------------------------|--------------------------|
| Local ip 1 | 172.16.75.118 / AC:81:12:C8:F8:AC | 172.16.75.1 / 08:1B:21:82:04:E2 | Wi-Fi adapter Broadcom 4313GR 802.11b/g/n 1x1 | 124 B/s                    | 14 B/s                   |
| Local ip 2 | 172.16.75.160 / 2C:76:BA:E0:15:63 | 172.16.75.1 / 08:1B:21:82:04:E2 | Intel(R) 82579V Gigabit Network Connection    | 335 B/s                    | 200 B/s                  |
