

The periodic task for sending of a log-file or its changes is dedicated to monitoring of logs of various applications, which create them. Through this periodic task, you can configure sending of these logs, or just their added part to an email of your choice. The task serves to better monitoring of a wide range of programs and applications. You can add it using the wizard for addition of periodic tasks in C-Monitor console. Setup of individual parts is described in the below.

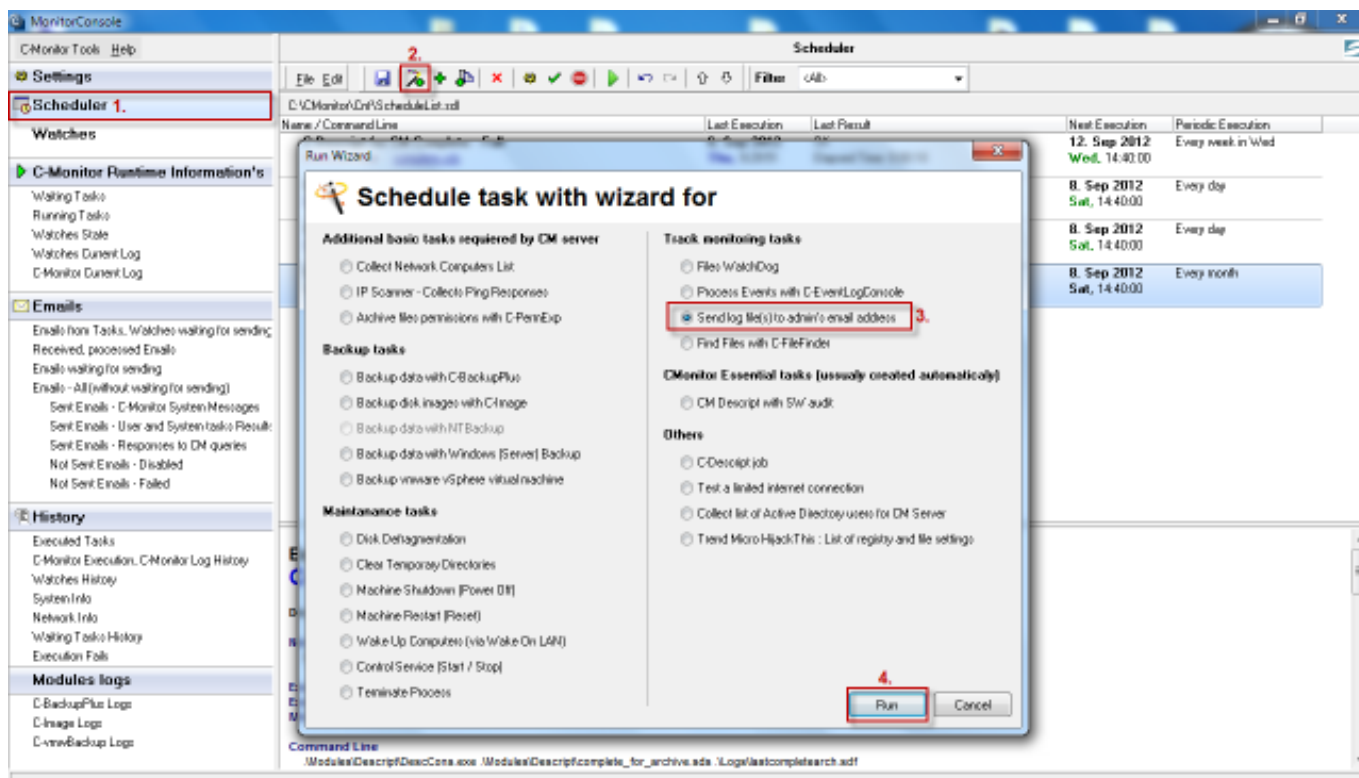

Image: Spustenie wizaru pre vytvorenie pravidelnej úlohy na posielanie pridaného obsahu log - súboru

Send log file(s) to admin's email address

**C Monitor**

**Specify Log File(s) which should be send**
