

**"You won't lose overview in your systems and settings.
Without unnecessary mistakes. Enjoy the overview along with your colleagues."**

All important data are available at one place and to everyone who needs them. Substitutability of colleagues saves time to both sides - you and your client. Settings, addresses, scripts... With CM you'll see the list of configuration changes in time. Thanks to the overview, you'll gain a global image for efficient implementation of IT service.
